Comments on the Official Action of August 30, 1979:

The Examiner agrees with our argumentation of November 8, 1978 to the effect that the use of the film as wrapping material is patentable. Therefore, the use claims of November 8, 1978 filed as an alternative (and reported with our letter of November 22, 1978) can be published for opposition. We now have to adapt the description to the use claims, all parts of the description not come under the definition of use claims 1 and 2 having to be cancelled. That adaption can be effected at this end.

We will have to remove all fancy names and, resp., trademarks and company names from the description. Hence, the following statements have to be deleted from the description (reference being made to the U.S. text as per page/line):

8/8: "NF grade",  
12/11: "grade 0.75/3.0",  
13/13: "Ventura Coastal Lemon Company ...",  
14/2: "Waring" blender,  
15/9: "Atlantic Gelatin ...",  
17/13: "standard Atlantic Gelatin Co. method",  
17/15: "Scott Serigraph",  
19/7: "Methocel 90HG",  
20/16-20: "grade No. C-105 ... Providence, R.I.", and  
23/5 and 9: "Greiner".

We would ask you notify us of the chemical designations or references by which the above-mentioned expressions can be replaced, or whether you agree to cancellation of those expressions without replacement. We would also ask you in particular to notify us of whether the expression "lemon albedo" in Examples 2 and 22 is a trade designation and of the chemical explanation by which it could, if the case would be, be replaced.
